Are there ways to make a funeral service a more personalized experience?

The short answer is yes. However, creating a meaningful life celebration means different things to different people. It might be something as simple as incorporating favorite music or displaying a treasured collection. For others, it might mean asking participants to wear a certain color or distributing a favorite flower. Basically, personalization is all about selecting and incorporating the options that make a difference to you and your loved ones. We will work with you to plan a service that is as unique as the person being remembered.
